

Instructions for your caravan

You will need:

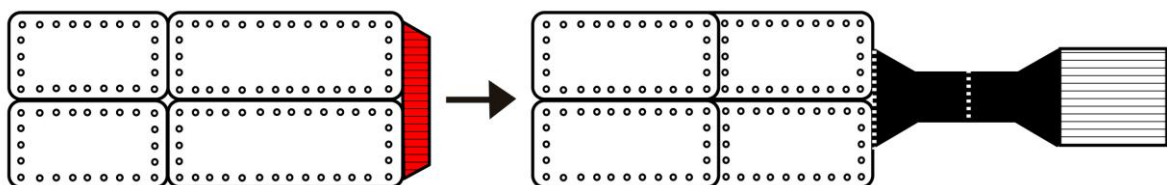

- Scissors
- Coloured pencils or textas
- Glue or glue stick
- Help from an adult

Step 1 Colour in your caravan if required.

Step 2 Cut out the Roof and both Sides:

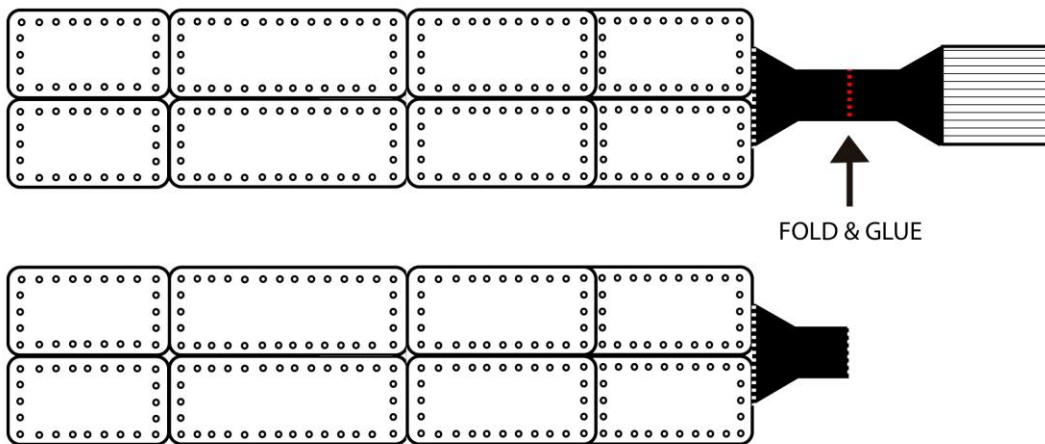

Step 3 Join the Roof via the **tab** to create one long roof section.

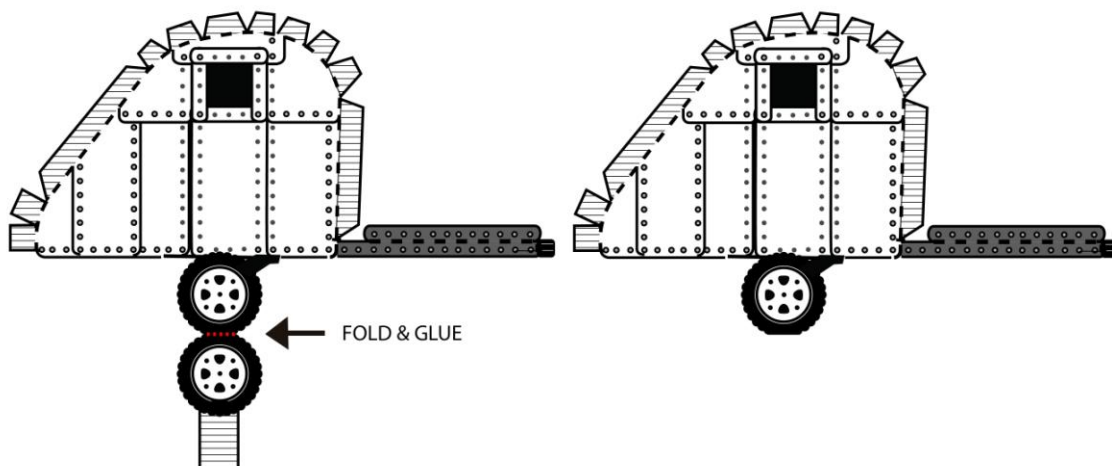

Instructions for your caravan

Step 4 On the Roof section, fold along the **dotted line** to create a double sided stabiliser at one end overlapping on the inside. Glue this together like below.

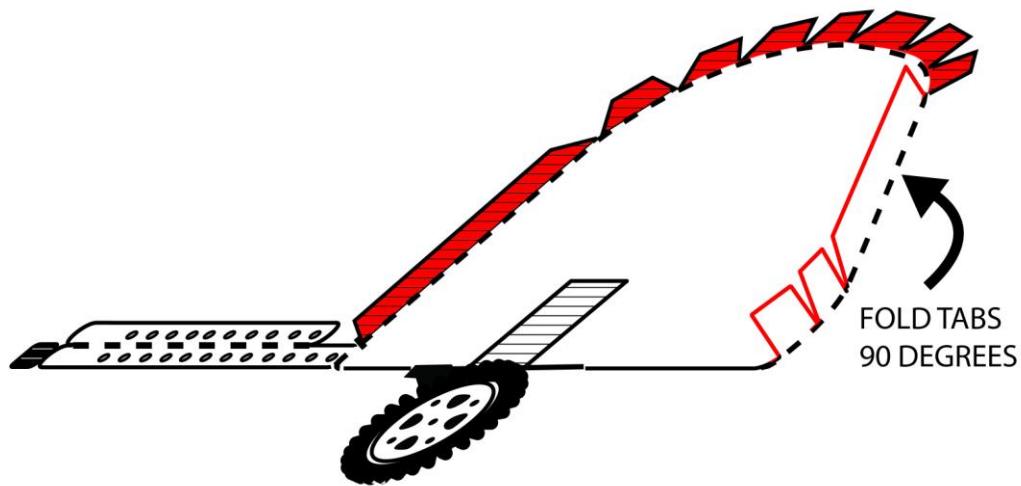

Step 5 On both Side sections, fold the **dotted line** separating the wheels to create double sided wheels that overlap onto the inside of the caravan area. Glue these double sided wheels together like below.

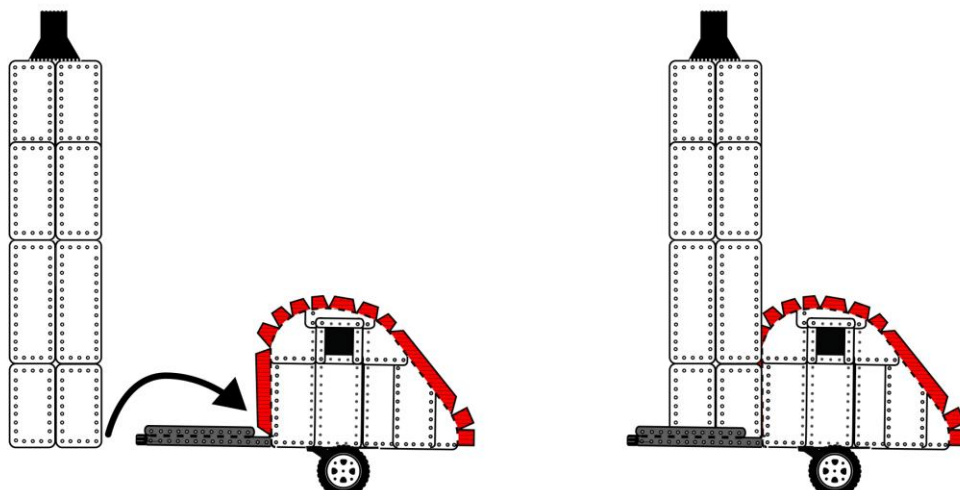

Instructions for your caravan

- Step 6** Turn each Side section upside down and fold all of the **tabs** around the edge 90 degrees upwards. All tabs should fold towards the inside of the caravan like below.

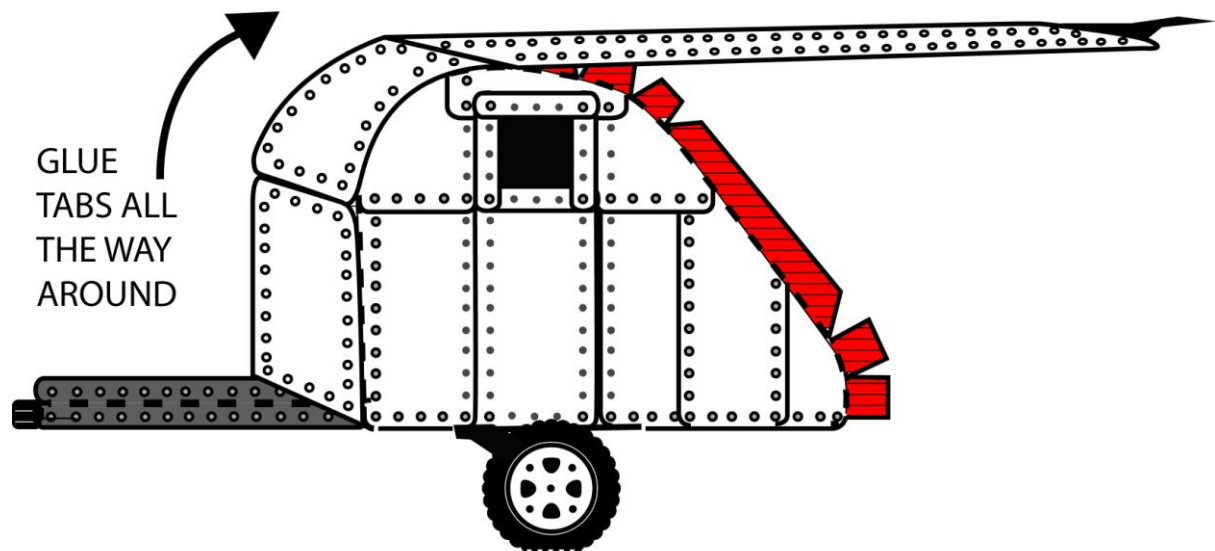

- Step 6** Pick up Side 2 and the Roof sections. Lay them on the table as shown below and glue all of the **tabs of Side 2**. Then lay the roof section as shown below, behind the grey trailer bar and over the first tab. Glue this tab only to the back of the roof section that overlaps.

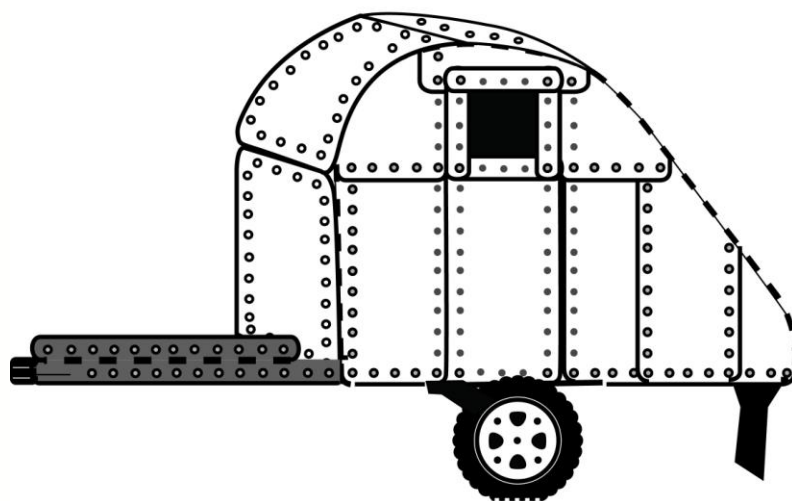

Instructions for your caravan

Step 7 Now this is attached, glue the tabs all the way around to the inside of the roof section. This will begin to create a curved caravan shape.

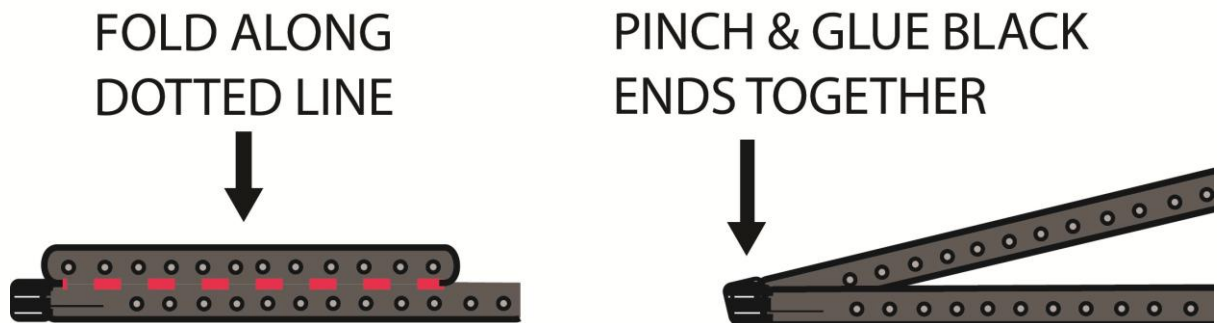

Step 8 Now repeat the same thing with the opposite, Side 1. Glue tabs onto the roof section until you have a solid caravan form.

Instructions for your caravan

- Step 9** Fold the top of the trailer arms along the dotted line on both sides so that they are flat on top. Pinch together the ends of the two trailer arms and glue them together.

You now have your own mini Bob Jenyns caravan ready to go!
